# A BRIEF COMPARISON OF SHARED VOCABULARY ACROSS TOP COUNTRY & RAP ARTISTS (DRAKE, MIGOS, BLAKE SHELTON, LUKE BRYAN)
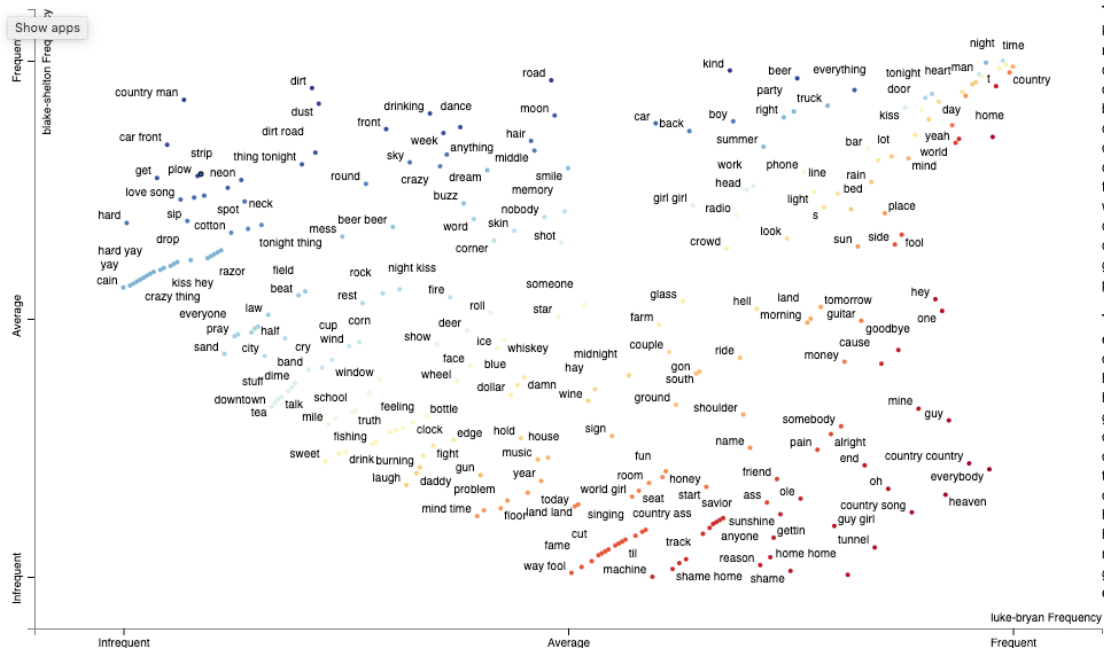

How To Interpret

The y-axis represents the frequency of words used by artist A x-axis represents the frequency of words used by artist b. If a point has a coordinate where y is really high and x is really low it means that it is unique to artists A and vice versa. If x and y are both really high both artists use the word frequently. If both are really low it used by both artists infrequently. The more points that lie on a linear line through the axis, the more similar the vocabulary.

*note some of the axes are flipped around
